PROFILE

Results-driven Project Manager with 14+ years of experience leading software, web, cloud, and AI-driven digital transformation initiatives across cross-functional engineering teams. Proven track record delivering 20+ projects on time and under budget, cutting delivery delays by up to 20% and operational costs by up to 25% through proactive risk, resource, and stakeholder management. Published researcher in project resource and schedule optimization, blending hands-on Agile and Waterfall delivery expertise with a data-driven, AI-informed approach to program governance.

WORK EXPERIENCE

Associate Project Manager

Apr 2022 – July 2026

Lucid Outsourcing Solutions

- Directed end-to-end delivery of 12+ concurrent software, web, and mobile projects (team sizes of 4–7) across Agile and Waterfall environments, consistently meeting release commitments.
- Owned the Agile delivery cadence — sprint planning, backlog grooming, retrospectives, and release coordination — across multiple product teams using Jira and ClickUp, improving sprint predictability and reducing scope creep.
- Built delivery dashboards, roadmap reports, and stakeholder communication frameworks that improved cross-team visibility and decision-making speed.
- Cut delivery delays by 20% by designing and rolling out a proactive risk and dependency-tracking framework adopted across the project portfolio.
- Led resource planning and coordination across development, QA, and design teams, keeping concurrent projects aligned on scope and schedule.
- Implemented a structured risk register and mitigation workflow that reduced late-stage scope and schedule risk across active projects.

KEY PROJECTS

AI-Powered Sales & Inventory Analytics Chatbot

Jan 2025 – Aug 2025 | Team Size: 4 | Tools: Python, FastAPI, OpenAI API, LangChain, MySQL, MongoDB, Vue.js, ClickUp

Led development and deployment of an AI-powered chatbot giving business owners real-time insight into sales performance, inventory levels, stock movements, and business trends, with automated data retrieval and actionable recommendations through a conversational interface.

- Coordinated a cross-functional team of AI engineers, backend developers, and QA specialists to build and ship the conversational analytics platform.
- Oversaw implementation of AI-driven analytics, forecasting models, and natural language query processing.
- Reduced manual report generation effort by 70% through automated conversational analytics.
- Improved inventory visibility, cutting stock-out incidents by 35%.
- Enabled real-time access to sales and inventory insights, reducing decision-making time by 60%.

E-commerce Multi-Vendor Portal

Jun 2022 – Nov 2022 | Team Size: 5 | Tools: Laravel, AngularJS, MySQL, ClickUp

Led development and implementation of a multi-vendor e-commerce portal centralizing inventory management and enabling multiple vendors to manage and list products with seamless inventory updates.

- Spearheaded end-to-end development and implementation, coordinating developers, UX designers, and QA engineers.
- Defined project scope, timelines, and deliverables in collaboration with stakeholders and business analysts.
- Developed risk mitigation strategies and stakeholder communication plans; oversaw sprint planning and task prioritization using Agile methods.
- Centralized inventory management, improving data accuracy by 30%, and reduced manual inventory updates by 50%.

Healthcare Staff Management Service Provider

Jan 2024 – Jun 2024 | Team Size: 5 | Tools: Jira, CFML, Coldbox, Vue.js, MySQL

Delivered a staffing system that simplified employee selection and management, reducing dependence on expensive third-party tools and improving daily operational efficiency.

- Managed the full project lifecycle, from planning and requirements gathering through execution and post-launch support.
- Reduced recruitment and onboarding time by 30% through process automation, and lowered operational costs by 25% by eliminating third-party staffing tools.
- Delivered the project 15% ahead of schedule, lifting client satisfaction by 20% and improving staff utilization by 40%.

Inventory Listing Solution

Oct 2022 – Present | Team Size: 11 | Tools: CFML, Coldbox, Vue.js, AWS, Flutter, WordPress, ClickUp

Directing a web-based inventory listing platform that centralizes inventory data and streamlines operations across all business channels.

- Directed the project team through all stages of development, from requirements gathering to deployment, while managing risk plans and stakeholder communications.
- Increased inventory accuracy by 40% and reduced manual inventory errors by 35% through centralized data management processes.
- Delivered the solution 10% under budget and 2 weeks ahead of schedule, achieving a 95% client satisfaction rate.

PRIOR EXPERIENCE

Service Manager — Reliance Jio Fiber	Sep 2021 – Feb 2022
Project Manager (Freelance Consultant) — Independent	Aug 2020 – Sep 2021
Business Development Manager — Coozmoo Technologies	May 2020 – Jul 2020
Business Development Manager — MSAP Corporation	Oct 2016 – Apr 2020
BSS Engineer — Nokia	Oct 2015 – Sep 2016
Asst. Transmission Engineer — Ericsson	Feb 2014 – May 2015
Site Engineer — Ganpati Infotech	Jul 2012 – Jan 2014

SKILLS

- Project & Program Management: Agile, Scrum, Waterfall, SDLC Management, Sprint Planning, Roadmap Alignment, Program Governance, Risk Management, Budget & Cost Management, Change Management, Vendor Management, Stakeholder & Client Communication, Cross-Functional Team Leadership, Resource Planning
- Project Tools: Jira, Trello, ClickUp, Slack, MS Project, Microsoft 365
- Technical Languages: PHP, Python, CFML, JavaScript, HTML, CSS, SQL, MongoDB, Playwright
- AI & Data Tools: OpenAI API, LangChain, FastAPI
- Design / Utility Tools: Photoshop, Illustrator, Canva, GitHub, GitLab, VS Code
- Analytics & Reporting: Microsoft Power BI, Microsoft Fabric
- Additional Training: CCNA

CERTIFICATIONS

- Google Project Management Professional Certificate (2024)
- Agile Project Management – Google (2024)
- PMI Project Management Foundations (2024)
- Google AI Essentials (2024)

RESEARCH PUBLICATION

Project Resource and Schedule Optimization for Maximum Productivity Under Budget Constraints
